

MULTIPLE HEARTH FURNACE IMPROVEMENTS

PROJECT DATA SHEET

LOCATION

Eastern US

PROJECT DESCRIPTION

The customer required upgrades to their incinerator to meet the new EPA regulations for existing Multiple Hearth Furnaces. The upgrades to the system included an EnviroCare VenturiPak scrubber, flue gas recirculation, a new feed system, furnace repairs, and new electrical instrumentation and controls. The furnace successfully passed compliance testing for the new EPA Section 60, Subpart M regulation for an existing furnace.

IFCO'S ROLE

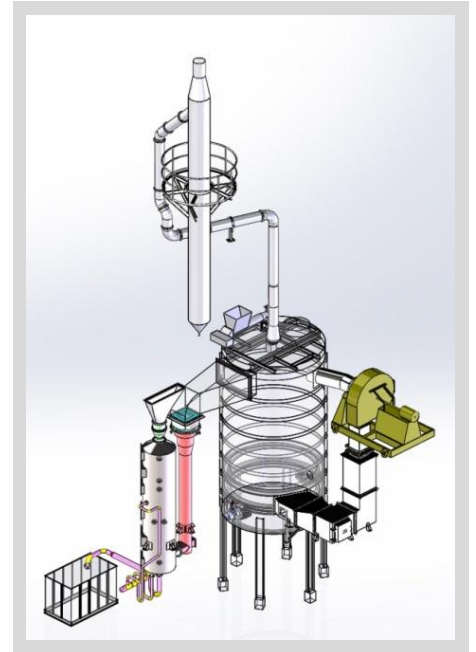

Design phase engineering assistance, equipment supplier, installation, commissioning

VALUE

\$2.4 Million

COMPLETED

2010
